

Important Information about your Temporary Driving Permit

- This temporary permit should be carried with your photo identification (ex. previous driver's license or identification card, valid passport, or work authorization card).
- This permit is to be used in place of a driver's license or learner's permit until your hard card is received in the mail, all applicable rules apply.
- If you received this permit because you are waiting for FLHSMV to review and approve your driver's license transaction, please wait until the last week this permit is valid to allow enough time for your license to be approved and mailed.
- If you return to the office to apply for an extension of this temporary permit or to follow up on the transaction that was processed, you must bring all primary, secondary, legal presence, and residential address documents.
 - An appointment is recommended, visit **LeeTC.com**
 - Please note: The Florida Department of Highway Safety and Motor Vehicles requires testing to be administered in English only.
- We do not recommend completing any additional testing (ex. road test) while waiting for this license to come in the mail, as you must wait for this license to be received prior to an upgrade.
- For additional questions about the review and processing time frame please contact FLHSMV at 850-617-2000.
